Hello All

E-Day 2019

April 6th The Enck!

Thorsten Quaeschning & Ulrich Schnauss.

For the first time on the main stage together with their music are!!

Thorsten Quaeschning and Ulrich Schnauss and the music of their CD "Synthwaves".
"Pure Berlin-school bliss from synthmeisters Thorsten Quaeschning and Ulrich Schnauss. Synthwaves pays homage to the masters of the past, yet feels fresh and enchanting. Crisp, interlocking patterns are modulated and mutated with mathematical precision into eight pieces of pristine, post cosmic sounds to float away to."

During two intense weeks in Berlin, Quaeschning and Schnauss – both students of the great, late maestro Edgar Froese – locked themselves in a studio full of vintage synthesizers, analog sequencers and drum machines, and the result is a gorgeous set of purely electronic music. As the title suggests, a bit of tongue-in-cheek playfulness was allowed during the process – however, all of these pieces sparkle with real emotion and warmth. As with the finest Tangerine Dream soundtracks it's the kind of music that paints vivid pictures on the canvas of the listeners mind: synth plucks hang in the air like glaring neon in metropolitan dusk, and zero-gravity pads hover like ghostly morning mist travelling over empty coastlines. Poly-rhythmic patterns are allowed to build - slowly but steadily - bar after bar, until synth-Satori is reached. By the time the last track on this album runs out, it's obvious these two producers have themselves become masters of their craft. They will perform a full 1.30 to 2.00 musical feast in the Enck!

Wolfram Spyra - His brilliant release *Dunst* still resonates through the EM Scene.
Now he is the headliner of the Afternoon!!

RHEA (Marc de Wit) Fantastic Space music from Belgium!
We hope to have the final line up next week but these are already great musical treats for all!!
Next week more!! But tickets sales are already possible.

gr-260 Devadder, Serge - Taxon

As for Serge Devadder's previous cds, the cover of this release features an abstract texture by abstract art painter Birgit Schweimler that somehow reminded the composer of an amphibian organism, which fits perfectly with the concept of the album. "Taxon", as its name suggests, is heavily influenced by Serge Devadder's fascination for comparative biology and the act of taxonomic classification as an attempt to bring order to the chaos of evolutionary drift. Its ambient sonic narrative explores the dark, murky, cruel, slimy processes of biological differentiation while expressing the composer's fascination for its complexity and versatility. Another source of inspiration was the famous cabinets of curiosities (the so-called "Wunderkammern") of the baroque rulers which displayed a blend of early natural history collections with more bizarre artefacts. Thus, Serge decided to name each of the seven tracks on the album after an organism, either from real nature or from the realm of fantasy.

So what's the music like? Well, it's a carefully moulded and shaped travelogue of tribal-organic electronics, moody textures and primordial alchemy matched with a few aquatic elements. Also note some distant horn calls merged with spatial sequences and deep spherics ("Alraune") or gentle bursts of conch shell trumpet (the closing piece "Conchilien"). The sequencing found on the release is also something special, putting things in fascinating yet exciting pulsating motion ("Vipern") while mesmerizing atmospheres materialize. And there's the fascinating track "Perlboot" (the German common name for the Nautilus pompilius) having a special meaning on the recording. The chambered nautilus-shell, with its many compartments, is a well-documented example of a near-golden spiral and almost a symbol of how mathematical principles drive growth and differentiation in biological processes. Hence Serge included a reference to the "golden ratio – Phi" Fibonacci-series in this piece (which comes with a beautiful video on You Tube) as the number of pulses follows the series between 1 and 233. This actually reflects the increasing size of the air-chambers in the shell.

"Taxon's" mesmerizing acoustic-infused, highly imaginative soundworlds are simply ear-candy as it paints its own sonic worlds of natural wonder. Check out this quality release if you like the organic ambient works Robert Rich, Loren Nerell and Steve Roach.

22029 FD.Project - Roots

Timeless II had consolidated the position of FD Project in the list of very influential musicians in the spheres of the EM of the Berlin School genre. And it's not with "Roots" that the German multi-instrumentalist will lose a centimeter of his place. Album teeming with very catchy rhythmic patterns, "Roots" proposes 7 structures laying down on movements of the sequencer which moves like a nest of rhythmic serpents. The sequences vibrate with usual tones as distorted and the percussions adjust these rhythms between phases of dance and others more sedentary while the synths and the guitar adjust their duels in a fascinating complicity which flows with so much evidence ... as if one can't go without the other in the FD Project universe. The title-track is reminiscent of Edgar Froese. The movement of the sequencer offers a line of rhythm that zigzags between its soft tones and other with distorted sounds. Another line is grafted and then another ... "Roots" then becomes a gyratory rhythmic crossroads which ends up relying on sober percussions. It's pure Berlin School from the late 70's with a rhythmic and melodic structure that moves its loops under good effects of astral mist and solos blown from the fingertips. "Revolution" follows with a good electronic rock that is just straddling a slow and lively structure. Heavy and spheroidal, the rhythm is certainly very catchy for the feet while serving as a basis for a guitar which exploits its heavy and aerial solos without forgetting its dance of the riffs. Some big electronic rock unique to the signature of Frank Dorittke. "Deep Dream" is another very catchy title. Its minimalist structure offers a good rhythm with slightly spasmodic curves. Sober percussions add a slight stir to a rhythmic ritornello that is thirsty for Techno and whose main core freezes an ear-worm well connected to our feet. The solos are divided between those of a synth, which leaves more room for rhythmic charm, and a voracious guitar which proves the possibility of a real complicity between the synth and the guitar in the world of EM. "50 Years TD ... Tribute" is a title that is more attached to the influences of Edgar Froese than Tangerine Dream. Its rhythm structure is just as sedentary as the others in "Roots". It wavers between its musical and distorted tonalities while being surrounded by nebulous effects and other slightly more organic effects. I try to find the links between this title and its meaning! One thing is certain however; that's the kind of title that requires several plays before seducing unlike the other 6 tracks on this album which are literally more accessible. "Bells" is another free interpretation and especially an umpteenth tribute to the tubular works of Mike Oldfield. This time the German guitarist-synthesist is inspired by the more contemporary harmonies of Tubular Bells. Molded a bit on the style of "Deep Dream", "B.T.T.R" offers a good dizzying electronic rock which is rich of its lively and jerky sequences. The percussions give tone to this structure whose skillful mesh between the tones of the sequencer

inspires a rock dance that welcomes its guitar solos after 6 minutes of enticing rhythm. "Open Land" ends this last opus of FD Project with a down-tempo approach that also relies on these patterns of intertwined and delicately convulsive rhythms which make the main charm of "Roots". Repetitive and magnetizing, "Open Land" is spinning like an ethereal waltz while offering this delightful balance between the effects of synth and the solos of a more discreet guitar. It's very Tangerine Dream, especially the guitar with its Edgar Froese's perfumes. The great strength of "Roots" is that it offers a music that one tames without difficulty. The rhythms are lively, catchy and melodious, even if they are conceived in the intertwining of a herd of serpents frozen at the same spot, whereas the guitar solos always have this little something inexplicable which brings out here the legendary solos of Edgar Froese. The fans of FD Project will be excited about "Roots" while other EM fans should enjoy this album without too much difficulty and maybe even get into his universe, especially since Frank Dorittke has officially opened his Bandcamp site. The download version of "Roots" is available there, while the CD will be on sale around October 20th.
